Portfolio

Quenchd (React JS, Rails)

[Live](#) [Github](#)

A social media app for craft beer enthusiasts inspired by Untappd

- Organizes React components and makes AJAX requests to backend using Flux
- Implements PGSearch to search multiple models at once.
- Stores images using Paperclip/AWS allowing Users to upload images for their activities.

Snake (Javascript, jQuery)

[Live](#) [Github](#)

A Javascript and jQuery implementation of the classic mobile game

- Utilizes key listeners to enter direction and asynchronous 'setTimeout' to move the snake.
- Keeps score, remaining lives, and a running tally of high score for the player.

ActiveRecord Lite

[Github](#)

- An ORM based off the functionality of Rails ActiveRecord.
 - Uses metaprogramming methods to create associations between models.
-

Skills

Ruby	Ruby on Rails	Javascript	ReactJS	jQuery
SQL	JBuilder	AJAX	HTML/CSS	AWS

Education

AppAcademy

- Immersive, Full Stack Web Development Course (acceptance rate <5%), 2015
